One Acquisition Solution for Integrated Services

## Flexible, innovative solutions for complex professional services

### Large Business Pool 6 Unrestricted Pools 1, 4, and 6

#### Fast Facts

- Extensive experience managing large teams and large, complex, IDIQ contracts with subcontracting greater than \$1B
- DCAA-approved business systems
- Demonstrated consistent cost and schedule performance
- AS 9100D, ISO 9001:2008, and SEI CMMI® Level 3 certified
- Founded in 1974 and headquartered in Huntsville, AL
- 1,800+ employee-owners
- Located in nine states and our nation's capital

For 45 years, Dynerics has been a trusted partner to Department of Defense and other government agencies undertaking many of the most challenging scientific and technologically advanced engineering missions.

We provide responsive, cost-effective engineering, scientific, and IT solutions to the national security, cybersecurity, space, and critical infrastructure sectors.

Our portfolio includes research and development services and a broad range of software and hardware products – components, subsystems, and end-to-end systems – in the following areas:

- Modeling and simulation
- Systems engineering
- Weapon system analysis
- Design and analysis
- System integration
- Hardware prototyping
- Low-rate manufacturing
- Tactical software
- Cybersecurity
- EO/IR/RF/Acoustic signatures
- Hardware in the loop evaluation
- Foreign material exploitation
- Test and evaluation
- Logistics and sustainment

Additionally, Dynerics offers core R&D capabilities in sensors, signal processing, algorithm development, data links, G&C, electronics, electronic warfare, aerodynamics, lethal mechanisms, propulsion, launchers, trainer systems, small satellites, and custom instrumentation of complex systems.

UAS Integration

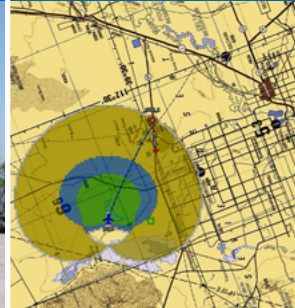

Propulsion Systems

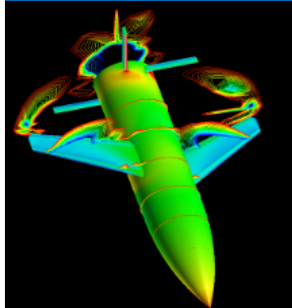

Sensor System Engineering

Mission Planning

CFD/Aerodynamics
